

# Optical Microfiber Cleaning Cloth

*This multi-purpose microfiber cloth is perfect to keep near your computer, with your eyeglasses, and a must for every camera bag!*

Cameras, Filters & Lenses

Computer Monitors

Binoculars & Telescopes

## Special features:

- Top-grade, ultra fine microfiber cloth
- Oversized 7" x 7" cloth provides a greater cleaning surface.
- Rubberized pattern on one side for a secure grip.
- Easily remove dust, oily stains, and fingerprints. Absorbs the tiniest dirt on surfaces like a sponge.
- Cleans without leaving water stains or scratches.
- Can be laundered for years of use. Simply machine wash in warm water using a mild soap.

Cat No. EK 154 6028

The KODAK Gear optical microfiber cloth is specially designed to clean and polish delicate surfaces. Instantly clean optical lenses, camcorders, CD's, computer screens, telescopes, binoculars, eyeglasses and more without scratching or smearing.

Made of ultra fine microfiber, the KODAK Gear cloth is strong, non-abrasive, and lint free. Unlike any normal cleaning material, the cloths special fibers trap particles and avoid the need for cleaners. The fibers are made of a blend of polyester and polyamide material, which are then split when produced. The combination of this special fiber and the splitting process generates a capillary force for high absorbency that enables the cloth to clean and polish at the same time. The cloth can be used wet or dry.

The KODAK Gear microfiber cloth features a unique rubberized textured grip on one side for easy handling. The rubberized grip prevents the cloth from slipping out of your hands when cleaning delicate surfaces.
