

TIFFEN® NudeF/X® Filters

Custom Complement Your Complexion!

The Nude/FX filters are a series of skin tone enhancing filters. They offer ultimate flexibility and control in shooting skin tones. They are designed to make your subject look their best.

Now, you have a choice! You can broaden your palette with 6 different skin tone colors to create and combine a variety of tones to suit your perceived vision. These filters allow you to custom complement a person's complexion or make-up or create a new look.

The Nude/FX filters infuse the background image with the representative filter color, blending skin tone and warmth to the scene. They are perfect for headshots, close-ups and whenever a lot of skin is showing in the image.

Combining the Nude/FX filter with one of Tiffen's Diffusion/FX or Glimmerglass filters provides the best of both worlds - beautiful, warm customized skin tones, and silky smooth skin without the unwanted wrinkles and blemishes. This is the ideal approach for both digital video and video and still imaging.

Nude/FX filters are available in densities 1, 2, 3, 4, 5 and 6 in professional sizes 4x4, 4x5.650, 6.6x6.6, 138mm and 4-1/2" and will be available in screw-in sizes 52mm-82mm for the digital and still photographer and videographer.
