

SAUNDERS[®] M3 ROTARY Trimmers

"Quality" is a word long associated with the Saunders name. Saunders has built a reputation for long-lasting quality in photographic products. Now, Saunders Professional M3 Series trimmers bring that same quality to a key area of image finishing.

With the continued growth of digital imaging and inkjet printing, there is tremendous demand for newer and more versatile precision cutting products. The M3 Series trimmers are designed to easily and accurately trim gang-printed sheets containing multiple prints in multiple sizes. This is especially useful at the many self-service print stations springing up around the country.

Durable, accurate, and easy to use

Our cutting head is die-cast alloy construction, which adds strength, maintains alignment, and guarantees years of service. It's molded to the shape of your hand with an exclusive Comfort Grip that makes repetitive work less fatiguing. Within the housing is a hollow-ground tool-steel rotary blade that is self-sharpening for a long life of clean, precise cuts.

Dual steel rails guide the cutting head with complete stability and precision for accurate, repeatable cuts. Four nylon bearings in the head further ensure quiet, effortless cutting. The extruded aluminum supports on each end lock in alignment. A transparent paper guide automatically holds material in place without risk of damage. An extruded aluminum alignment scale is factory-locked to be perfectly square to the blade edge. The alignment scale has measurements in inches and centimeters and accepts the slide guide for making repeatable cuts. The baseboard wipes clean in seconds. A durable, silk-screened registration grid, laid out in 1-inch increments, covers the baseboard for quick and easy measuring of any print or document.

Designed for safety

The cutting blade is completely covered by the blade housing—making the M3 Series an ideal choice for schools, offices, darkrooms, self-service print stations, and high-volume production labs.

Through thick and thin

Saunders Professional trimmers have the heft to cut through materials up to a 1/8" (3mm) thickness. They trim cardboard, litho plates, laminates, and mounting board just as easily as film and photo print paper. You have five models to choose from, ranging from 12" to 48" cut lengths.

Saunders Professional M3 Series Trimmers provide precise cuts on:

Art board
Films
Paper
Vinyl

Card stock
Heat seal materials
Photo paper

Construction paper
Laminates
Plastic

Digital output paper
Litho plates
Veneers

SAUNDERS[®] PROFESSIONAL M3 ROTARY Trimmers

Saunders Professional M3 Series trimmers are ideal for:

- | | | | |
|------------------------------------|---------------|-----------------------|-----------------------------------|
| Ad agencies | Custom labs | D&P counters | Digital workstations |
| Graphic design studios | Home offices | Image service bureaus | Laminating/dry-mounting work |
| Large-format graphics applications | Photo studios | Prepress shops | Quick-print self-service counters |
| Schools and classrooms | | | |

End supports Pre-engineered to hold the guiderails in place to ensure the strictest tolerances for ultimate smooth operation and consistent cutting.

Better-designed blade housing The rotary blade is covered by a die-cast housing, specially molded to fit the contours of your hand. The unique Comfort Grip is embedded with padding for a secure hold. It's soft against the palm of your hand, especially nice when making repetitive cuts.

Slide Guide Use the slide guide for making cuts without repetitive measuring. The slide guide attaches to the alignment scale and locks in place at the desired position.

Alignment scale The extruded aluminum alignment scale provides a solid edge for positioning, and it shows both inches and metric measurements.

Model:

M3-48"

M3-36"

M3-24"

M3-18"

M3-12"

M3 SERIES CUTTER SELECTION CHART	
Catalog Number	Maximum Cut Length
890-012AS	12 inches/30.5cm
890-018AS	18 inches/45.7cm
890-024AS	24 inches/61cm
890-036AS	36 inches/91.4cm
890-048AS	48 inches/121.9cm

5 year warranty!

Saunders Professional trimmers are backed with a five-year warranty, a statement of our conviction of its reliability and durability. Only the cutting blade is excluded, as a normal-wear component.
