

Brackets for Square Format Cameras

Pro-SQ

Our most advanced square-format bracket.

The Pro-SQ is identical to the Pro-RL, except it has a fixed, non-rotating camera platform. It offers the same handling speed and ease of use. The bracket is supported comfortably with your left hand, leaving your right hand free to operate all camera and bracket functions. The use of a cable release is not required.

In addition to accepting all square-format cameras, the Pro-SQ is also the bracket of choice for Mamiya RB/RZ.

Features:

- Flash is centered high over the lens, eliminating side-shadows and "red-eye," for better lighting.
- Exclusive, one-hand TiltTrigger™ lets you set the flash angle to any of 12 click-stop positions, from close-up to bounce. Just squeeze and twist to set.
- One-handed, instant flash height adjustment. You can position the flash 11" to 18" above the lens by simply twisting a knob and lifting the flash arm.
- Unique "kickstand" pivots out to safely support and stabilize the bracket when set on a table or floor.
- Solid, machined components for optimum rigidity.
- Integral QR (Quick-Release) Plate mates to optional QR Receiver, allowing the bracket and tripod to be attached or detached instantly.
- Accepts all Stroboframe flash mounts, Camera Anti-Twist Plates and Quick-Release accessories.

BEST LIGHTING CONTROL

MOST COMPACT

QR66

Ultra-compact bracket for Hasselblad and Bronica SQA.

The QR66 was developed to the specifications of celebrity wedding photographer Denis Reggie. This bracket is for those who want all the advantages and control of over-the-lens flash positioning with the least bracket bulk and weight. Elegantly simple, rugged and practical.

Features:

- For Hasselblad and Bronica SQA with or without Speed Grip.
- Bracket incorporates a camera anti-twist system, so a separate anti-twist plate isn't needed.
- Integral QR (Quick-Release) Plate mates to optional QR Receiver, allowing the bracket and tripod to be attached or detached instantly.
- Flash angle adjustable for close-ups.
- Large, neoprene foam grip for comfortable shooting and carrying.
- Optional cable-release kit attaches easily to grip.

QR66 Specifications

Net Weight: 11.4 oz.

Bracket Height: 10"

Nominal Lens-to-Flash Distance: 13"

Includes: Camera mounting screws, 1/4"-20 flash mounting knob
