

# Brackets for Cameras without Built-in or Accessory Grips

## Quick Flip 350 (35mm) Quick Flip 120 (Medium Format)

*Our most economical  
flash-rotating brackets.*

The Quick Flip models offer high value, compact size, light weight and fast handling. These are the best-selling brackets on the market. Although lower in price than our top-of-the-line brackets, they share the same quality materials and construction. The Quick Flip 350 accepts all 35mm cameras *except* those with large, accessory battery packs or motor drives. The Quick Flip 120 has a large base for medium format cameras and is configured for both eye-level and waist-level viewing.

Quick Flip

**LIGHT, FAST,  
LOW-PRICED!**

Catalog Number: 310-666  
(Quick Flip 120)

NOTE: Quick Flip models do not accept  
Camera Anti-Twist Plates.

### Features:

- Pivoting flash arm keeps the flash centered above the lens for both horizontal and vertical compositions.
- Supplied with a machined, positive-locking shoe mount that is interchangeable with an optional handle mount.
- Strong, lightweight, aluminum construction with baked-on finish for hard use and durability.
- High-density, neoprene foam side grip for comfortable shooting or carrying.

Stroboflip

## Stroboflip The most compact approach to flash rotation.

The Stroboflip is an ultra-compact, "gripless," flash-rotating bracket. It cradles the camera unobtrusively while maintaining an over-the-lens flash position. Its design lets you hold the camera, rather than a grip, and rotate the flash for horizontal or vertical composition. An additional advantage is that the stress and weight of the flash unit is transferred from the light-duty camera shoe to the rugged Stroboframe mount. The Stroboflip is made for shoe-type flash units.

### Features:

- Accepts all 35mm SLRs and smaller 6 x 4.5mm cameras.
- Supplied with a machined, positive-locking shoe mount and a 35mm Anti-Twist Plate (interchangeable with other AT Plates).
- Strong, lightweight aluminum construction with baked-on finish for hard use and durability.

**THE  
ULTRA-COMPACT,  
"UN-BRACKET!"**

### Stroboflip Specifications

Net Weight: 9 oz.

Bracket Height: 5.5"

Nominal Lens-to-Flash Distance: 7.5"
