

# More Problem-Solvers from Stroboframe

## Flash/Umbrella Bracket for Light Stands

### Studio Lighting on Location

Achieve softer, better lighting on location with Stroboframe's Flash/Umbrella Bracket. This versatile bracket holds any flash and umbrella and mounts onto any light stand. Quick and easy adjustments let you position and aim light where desired. The flash is centered on the umbrella's axis for even light distribution. A standard Stroboframe flash mount is required for shoe or handle-type flash units. A knob is included for mounting flash heads with 1/4"-20 sockets.

*The ultra-portable Flash/Umbrella bracket works with any light stand, umbrella and flash.*

#### Features:

- Mounts onto any light stand with a mounting stud up to 5/8" diameter.
- Accepts umbrella shafts up to 3/8" diameter.
- Fully adjustable to maintain flash/umbrella centering.
- Heavy-duty, aluminum construction with baked-on, non-reflective finish.
- Large, easy-grip knobs for quick adjustments and secure locking.
- Folds flat for compact storage.
- Accepts all standard Stroboframe flash mounts, sold separately. Supplied with standard 1/4"-20 flash mounting knob for flash units such as Lumedyne or dedicated cords such as the Nikon SC-17.

#### Flash/Umbrella Bracket Specifications

*Net Weight:* 11.5 oz.

*Includes:* 1/4"-20 flash mounting screw

*Suggested Accessories:* Flash Mounts, Flash Quick Release

*Catalog Number:* 300-125

## Stroboframe Camera Auto Quick Release "QRC"

### Mount and Dismount Your Camera Faster

Think for a moment about the time you spend fumbling with screws while attaching your camera or bracket to a tripod. Detaching it is not much quicker. Now, consider the speed, convenience and safety of this instant, snap-in mounting system.

The Stroboframe QRC is a compact, low-profile quick release that automatically docks and locks your camera or bracket to a tripod. It releases with a press of the locking lever. The QRC is also perfect for use with studio stands and copy stands.

The system consists of a *QR Receiver*, which is mounted to the tripod, and a *QR Plate*, which is attached to the camera. Many of our brackets have an *Integral QR Plate* built in.

To use the Stroboframe QRC, lower the camera or bracket into the QR Receiver and push down. "CLICK!" your camera is mounted and securely locked into place. To remove the camera or bracket, squeeze the QRC's lever and lift out. The system is compatible with all 35mm and medium format cameras. Camera Anti-Twist Plates can also be used with the system.

QRC systems are available as a complete kit, including a QR Receiver and a QR Plate. Or, you can purchase the QR Receiver alone for use with Stroboframe brackets that have Integral QR Plates. Standard QR Plates are also sold separately.

The unique QRC Quick-Release system has many other applications. For example, it is used with copy stands for faster, convenient film reloading without disturbing the setup. In addition, it can be used for mounting spotting scopes for birding and target shooting. Skydivers even use it to mount cameras on their helmets!
