

NEW

Attenuator/Blender

Tiffen's NEW screw-in sized ND Attenuators have been designed to offer a fine degree of neutral light control attenuation on wide-angle lenses. The smooth transition across the surface of the filter is designed to aid light control within your image area for a number of purposes, including maintaining a constant exposure range across your image when you have a bright sky.

Product Features & Benefits

- Available in ND .6 & ND 1.2 Densities
- Quick, compact and simple alternative to filter holders
- Rotational ring which allows for adjustment of grad position
- Eliminates overly bright, washed-out images
- Especially useful in bright light conditions to help prevent overexposure
- Easy-to-clean surface

New Tiffen Blender/Attenuator Filters are available in: 40.5, 43, 46, 49, 52, 55, 58, 62, 72, 77 and 82mm ring sizes.

Tiffen filters have been helping create the world's greatest images for over 75 years. Our ColorCore® technology assures consistency every time. Tiffen has been recognized for its product and engineering excellence, earning a Technical Achievement Award and a Scientific and Engineering Award from the Academy of Motion Picture Arts & Sciences, as well as multiple Emmy® Awards - no wonder Tiffen filters are the overwhelming choice of Cinematographers and Directors of Photography worldwide.
