

NEW

IR Variable ND

The Tiffen IR Variable ND is a unique, versatile and flexible tool, affording you the convenience of using several Neutral Density filters and an Infra-Red transmission blocker all in one. Primarily used as a photographic tool for controlling depth of field and exposure, the IR Variable ND is being sought in the video market as well because it is fast, easy to use, small, lightweight, and does not require additional accessories such as a matte box.

Product Features & Benefits

- Provides 2 to 8 stops of light control
- Wider outer optic to help reduce vignetting at wide angles
- IR blocker added to allow for control of Infra-Red pollution
- Controls depth-of-field

New Tiffen IR Variable ND is available in a 77mm Ring Size

Tiffen filters have been helping create the world's greatest images for over 75 years. Our ColorCore® technology assures consistency every time. Tiffen has been recognized for its product and engineering excellence, earning a Technical Achievement Award and a Scientific and Engineering Award from the Academy of Motion Picture Arts & Sciences, as well as multiple Emmy® Awards – no wonder Tiffen filters are the overwhelming choice of Cinematographers and Directors of Photography worldwide.
