

Black Glimmerglass® Filters

Tiffen's newest "film look" filters!

Responding to the demands of cinematographers, Tiffen's new Black Glimmerglass® filters aid cinematographers in taking the hard crisp edge off the image that modern digital lenses and cameras can produce, especially with 4K sensors, and are designed to enhance the natural beauty of talent with minimal signs of filtration. *Black Glimmerglass filters offer all of the benefits of the original Glimmerglass filters, PLUS, they subtly remove harsh sharpness from modern lenses, and add a pleasing overall blending to contrast levels.* Additionally, these filters maintain a clear, overall in-focus image, offering a filmic aura to digital acquisition.

Product Features & Benefits

- Smooths out unwanted blemishes and wrinkles
- Gives a silky smooth look to textured surfaces
- Softens details in a unique manner, while adding a grainier mild glow to highlights
- Effect of lighter grades more subtle with higher grades becoming gradually more noticeable
- Made from water white glass

New Tiffen Black Glimmerglass® Filters are available in: 4 x 4, 4 x 5.650, 6.6 x 6.6 sizes and Grades 1/8, 1/4, 1/2, 1 & 2

Tiffen filters have been helping create the world's greatest images for over 75 years. Our ColorCore® technology assures consistency every time. Tiffen has been recognized for its product and engineering excellence, earning Technical Achievement Awards and a Scientific and Engineering Award from the Academy of Motion Picture Arts & Sciences, as well as multiple Emmy® Awards- no wonder Tiffen filters are the overwhelming choice of Cinematographers and Directors of Photography worldwide.
