

Black Pearlescent® Filters

Tiffen's newest "film look" filters!

Responding to the latest demands of cinematographers, Tiffen's new Black Pearlescent® filters aid cinematographers in taking the edge off the image from modern digital lenses and cameras, especially with 4K acquisition sensors – specifically in mind to enhance the natural beauty of talent. *Black Pearlescent filters offer all of the benefits of the original Pearlescent filters, while adding a slightly reduced halo effect on spectacular highlights, and gently softening the overall image with a smooth glow.* Today's increased in-camera sharpness and contrast can sometimes show intense detail, and it's here where the Black Pearlescent filter's look comes into its own.

Product Features & Benefits

- Creates a special "atmosphere" by softening excess sharpness and lowering of contrast
- Generates a reduced pearlescent halo around highlights
- Lighter grades help tone down the excessive sharpness and contrast
- Maintains apparent focus
- Often used to mute colors for exquisite pastel tones
- Made from water white glass

New Tiffen Black Pearlescent® Filters are available in: 4 x 4, 4 x 5.650, 6.6 x 6.6 and Grades 1/8, 1/4, 1/2, 1 & 2

Tiffen filters have been helping create the world's greatest images for over 75 years. Our ColorCore® technology assures consistency every time. Tiffen has been recognized for its product and engineering excellence, earning Technical Achievement Awards and a Scientific and Engineering Award from the Academy of Motion Picture Arts & Sciences, as well as multiple Emmy® Awards- no wonder Tiffen filters are the overwhelming choice of Cinematographers and Directors of Photography worldwide.
