

Black Soft/FX[®] Filters

Tiffen's newest "film look" filters!

Responding to the latest demands of cinematographers, Tiffen's new Black Soft/FX[®] filters aid cinematographers in taking the edge off the image from modern digital lenses and cameras, especially with 4K acquisition sensors – specifically in mind to enhance the natural beauty of talent with minimal signs of filtration. *Black Soft/FX filters offer all of the benefits of the original Soft/FX[®] filters, PLUS, these filters produce a continuous softening effect with increasing atmospheric haze.* Additionally, these filter elements maintain a clear, overall in-focus image, offering a filmic aura to digital acquisition.

Product Features & Benefits

- 2 diffusion effects in one filter, reducing multiple surfaces and potential reflection from stacked filters
- Gently smoothes out unwanted blemishes and wrinkles
- Gives a silky smooth look to textured surfaces
- Subtly softens details in the unique SOFT/FX style, while adding a gentle mild glow to highlights
- Effect of lighter grades is more subtle, with higher grades becoming gradually more noticeable
- Made from water white glass

New Tiffen Black Soft/FX[®] Filters are available in: 4 x 4, 4 x 5.650, 6.6 x 6.6 sizes and Grades $\frac{1}{8}$, $\frac{1}{4}$, $\frac{1}{2}$, 1 & 2

Tiffen filters have been helping create the world's greatest images for over 75 years. Our ColorCore[®] technology assures consistency every time. Tiffen has been recognized for its product and engineering excellence, earning Technical Achievement Awards and a Scientific and Engineering Award from the Academy of Motion Picture Arts & Sciences, as well as multiple Emmy[®] Awards- no wonder Tiffen filters are the overwhelming choice of Cinematographers and Directors of Photography worldwide.
