

INTRODUCING STEADIPROMPT™

Prompter for
Camera Stabilizing Systems

LISTEC™

teleprompters

The
STEADIPROMPT™
Series

STEADIPROMPT™ SP-2010

The Listec™ SteadiPrompt™ Prompters have been specifically engineered and designed for camera stabilizing systems. These prompters were developed for operators who have the need to attach a prompting device to their rigs. The unit is ideal for news programs, talk shows, sporting events, commercials and any other production where talent is on the move.

In the past Steadicam® operators had to adapt studio or portable prompters to their rigs. This was not always the best solution as some of these displays could be heavy or hard to handle. If the operator was renting the equipment there was no guarantee he would get the same unit each time. The SteadiPrompt™ is the result of the combined efforts of Listec™ innovation and Steadicam engineering.

STEADIPROMPT™ features:

- Specifically designed and engineered for Camera Stabilizing Systems, such as the Steadicam® Archer® Series, Ultra2® series, Zephyr®, Phantom®, Phantom-V® and Clipper® Series
- Easy new rod mount assembly with folding hood and 65/35 coated mirror
- Mounts with Camcorders, DSLR cameras, Broadcast and Digital Cinema Cameras
- SteadiPrompt™ Carry Case by Domke®
- Available in 8" and 10" LCD displays
- Lightweight Prompter weighs only 6.5 lbs.
