**Product(s) affected :** Merlin Docket Bracket  
**Part(s) affected :** 801-7900 Docking Bracket Assembly

---

### **Update :**

In order to prevent accidental damage to equipment docked on the Merlin Docking Bracket, periodically insure that the 6-32 set screw that is used to hold the docking bracket arm in place is secure using a 5/64" Allen Key Wrench. Over time, this screw may loosen causing the arm to sag or break away unexpectedly during use.

Note that this bracket has been designed to support the weight of a Merlin™ Steadicam ® loaded to its maximum stated camera capacity. Any loads placed on the bracket above this stated capacity may cause component failure.
